2.4 GHz Agreement

At their April 19, 2008 meeting the AMA Executive Council approved a process to waive – on a provisional basis – the frequency-management agreement requirements as listed under item 6 in the RC section of the current AMA Safety Code for club(s) operating exclusively on 2.4 GHz.

The _____ (Club Name), AMA Charter # _____, acknowledges and agrees that model operations by all club members, guests and visitors at _____ (site location) will be exclusively on 2.4 GHz.

The club will make every effort to inform all modeling participants of this requirement and will enforce the 2.4 GHz usage. Unless prohibited, the club must post appropriate signage at the flying site location¹.

Club Officer's signature (required)

Date

Club Officer's signature (required)

Date

¹ Various signs stating "2.4 GHz use only" will be posted at the flying site, unless the property owner prohibits any postings. Signs must be prominently displayed at least at the field entrance, with the field rules and with the current Safety Code poster. Additional signage is recommended. The club may consider installing a generic frequency board with an additional "2.4 GHz use only" posting.
